

Abstract

Please substitute the following clean copy abstract text for the pending abstract text on page 29 of the specification.

ABSTRACT

A system and method for capture and utilization of content source information. According to one aspect of the invention, the method includes electronically capturing content, electronically capturing source information pertinent to the source of the captured content, associating the content and the source information; and transmitting the content and source information to a device for manipulation. According to another aspect of the invention, the method includes receiving content and associated source information pertinent to the source of the content in electronic form, reconfiguring the content and associated source information for use in a user application, and automatically creating at least one source acknowledgement in the user application.
